SEE & ID Dolphins & Whales

Identify & Protect Wild Marine Mammals

Use the electronic field guide to:

- Identify dolphins, whales, manatees, and seals using images and descriptions;
- Use maps to learn where marine mammals live; and
- Learn about their behavior, diet, life history, and more…

Viewing guidelines will help you:

- Protect marine mammals when you see them in the wild, and
- Make sure you are following the law.

Report and Help Stranded Marine Mammals

Sick, injured, and dead dolphins, whales, and seals can become stranded along the coast or in nearshore waters.

- **Report** strandings to your local stranding response hotline.
- **Help** rescue marine mammals by following the list of "dos and don'ts" such as do not push the animal back out to sea.
- **Identify** the marine mammal using the electronic field guide.
- **Send** a photo and GPS coordinates of the stranded animal to the Marine Mammal Stranding Network.
