NOAA Fisheries Seeks Comments on a Proposal to Revise Accountability Measure Language in the U.S. Caribbean Fishery Management Plans

Comment Period Ends April 4, 2016

NOAA Fisheries seeks public comment on the Comprehensive Amendment to the U.S. Caribbean Fishery Management Plans: Application of Accountability Measures.

Purpose of the Accountability Measures Application Amendment

The amendment would resolve an existing inconsistency between language in the Reef Fish, Queen Conch, Spiny Lobster, and Corals and Reef Associated Plants and Invertebrates Fishery Management Plans of Puerto Rico and the U.S. Virgin Islands and the regulations guiding the application of accountability measures in the U.S. Caribbean exclusive economic zone. The purpose of the amendment is to ensure the regulations governing accountability measures in U.S. Caribbean federal waters are consistent with their authorizing fishery management plans.

Proposed Management Measure

Accountability measure language in the four fishery management plans would be modified to reflect current regulatory text. The result of this proposed change would be that an accountability measure-based closure would only apply for the fishing year in which it was implemented. This approach is consistent with the intent of the Council and implementing regulations used by NOAA Fisheries to apply accountability measures in U.S. Caribbean federal waters. The current process used by NOAA Fisheries and the Caribbean Fishery Management Council to apply accountability measures would not change as a result of this proposed amendment.
