¹ Green turtles are listed as threatened, except for breeding populations of green turtles in Florida and on the Pacific Coast of Mexico, which are listed as endangered.

² Northwest Atlantic Ocean (NWA) Distinct Population Segment (DPS) was listed as threatened. NMFS and USFWS issued a final rule changing the listing of loggerhead sea turtles from a single, threatened species to nine DPSs listed as either threatened or endangered in 2012 ([76 FR 58868](#)).

³ NMFS listed two Atlantic sturgeon DPSs that spawn in the southeast (the Carolina and the South Atlantic) ([77 FR 5919](#)). There are an additional three Atlantic sturgeon DPSs in the northeast that spawn in the northeast (the Gulf of Maine, New York Bight, and Chesapeake) ([77 FR 5880](#)). Depending on the project area, a combination of DPSs may be present, particularly in marine waters. Please see Federal Register Notices for additional information.

Candidate Species:
NMFS maintains a list of species that are undergoing an ESA status review that NMFS has announced in a Federal Register Notice. They are called “candidate” species as they are being considered for listing under the ESA, but are not yet subject to a proposed listing rule. To view the candidate species list, please visit: http://www.nmfs.noaa.gov/pr/species/esa/other.htm
Species of Concern:
NMFS maintains a list of species for which there are concerns regarding their status and threats. Federal agencies and the public are encouraged to consider these species during project planning. To view the Species of Concern list and receive more information please visit: http://sero.nmfs.noaa.gov/pr/SOC.htm
