#### Peer Review

In accordance with our policy published in the **Federal Register** on July 1, 1994 (59 FR 34270), and the Office of Management and Budget’s Final Information Quality Bulletin for Peer Review, dated December 16, 2004, we are soliciting the expert opinions of at least three appropriate and independent specialists regarding the science in our proposed rule published on June 17, 2015 (80 FR 34595). The purpose of such review is to ensure that we base our decisions on scientifically sound data, assumptions, and analyses. We are sending peer reviewers copies of the proposed rule and inviting them to comment, during this reopened public comment period, on the specific assumptions and conclusions regarding the proposed delisting. We will summarize the opinions of these reviewers in the final decision document, and we will consider their input and any additional information we receive as part of our process of making a final decision on the proposal. This correction clarifies what types of man-made structures are not included in the proposed designation.

#### Correction

The proposed rule that published in the **Federal Register** on June 3, 2016 (81 FR 36078), contained misleading language regarding what areas were not to be considered part of the proposed designation. The original language inadvertently identified "marinas" and "maintained channels" as examples of areas not included. Because marinas and maintained channels may contain the physical features essential for the conservation of the species, these areas should be included in critical habitat. Further, the original language did not specify a date by which such structures would have to be in place to be considered "existing". Therefore, we are clarifying what is meant by the term "man-made structures," and we are inserting an effective date by which such structures would be covered under this provision.

#### Correction

In proposed rule FR Doc. 2016-12744 beginning on page 36078 in the issue of

June 3, 2016, make the following correction.

#### § 226.226 [Corrected]

On page 36101 in the third column, paragraph (d) of § 226.226 is corrected to read as follows:

“(d) *Areas not Included in Critical Habitat*. Pursuant to ESA section 3(5)(A)(i), critical habitat does not include areas containing existing (already constructed), as of [EFFECTIVE DATE OF FINAL RULE], federally authorized or permitted man-made structures where the physical features are not expected to be found, such as aids-to- navigation (ATONs), artificial reefs, boat ramps, docks, or pilings within the legal boundaries.”

Dated: June 17, 2016.
